

# CS 32 Academic Integrity Agreement

Computer Science Department  
University of California, Los Angeles

Winter 2017

In order to earn any points on your CS 32 coursework, you must turn in this signed agreement. This is a serious document; do not sign it without reading it.

The Academic Integrity document referred to is printed on the back of this page. It can be reached from the class webpage by following the Academic Integrity link, which takes you to <http://cs.ucla.edu/classes/winter17/cs32/integrity.html>.

I, the undersigned CS 32 student, have read the Academic Integrity document.  
I understand it and agree to abide by the policy it expresses.

Name (please print) \_\_\_\_\_

Student ID number \_\_\_\_\_

# Academic Integrity

At <http://www.deanofstudents.ucla.edu/Academic-Integrity>, the Office of the Dean of Students presents University policy on academic integrity, with special attention to cheating, plagiarism, and student discipline. The policy summaries don't specifically address programming assignments in detail, so we state our policy here.

Of course, you understand that your work on programming assignments must be your own. But we understand that high-level discussions about approaches to a problem have educational value and are acceptable. So where do we draw the line? We'll decide each case on its merits, but here are some categorizations:

## Acceptable:

- Clarifying what an assignment is requiring
- Discussing algorithms for solving a problem, perhaps accompanied by pictures, without writing any code
- Helping someone find a minor problem with their code, provided that offering such assistance doesn't require examining more than a few lines of code
- Turning in someone's work without crediting the author of that work, if the source of that work is the course text or if that work was produced at or *after* the start of this quarter by a CS 32 instructor or a CS 32 TA

## Unacceptable:

- Turning in any portion of someone's work without crediting the author of that work, if the source of that work is *not* the course text and if that work was either *not* produced by a CS 32 instructor or a CS 32 TA or was produced *before* the start of this quarter
- Using or adapting a portion or all of a solution from earlier offerings of this or any other class
- Soliciting help from an online source where not all potential respondents are subject to the [UCLA Student Conduct Code](#)
- Receiving from another person (other than a CS 32 instructor or a CS 32 TA) a code fragment that solves any portion of a programming assignment
- Writing for or with another student a code fragment that solves any portion of a programming assignment
- Helping the same person find problems with their code more than a few times for a particular assignment

Be especially careful about giving a copy of your work to a friend who wants to “just look at it to get some ideas”. Frequently, that friend ends up panicking and simply copies your work, thus betraying you and putting you through the hassle of an academic discipline hearing. The Dean has additional [advice](#).

You must abide by this policy in addition to those expressed in the [UCLA Student Conduct Code](#). In accordance with University policy, we will submit cases of suspected violations of this policy to the Dean.
