Prepared by Zaphod Beeblebrox — Handout 2: Using LaTeX

Some useful links to learn LaTeX are:

- http://www-h.eng.cam.ac.uk/help/tpl/textprocessing/ (lots of tutorials here)
- http://web.mit.edu/olh/Latex/ (MIT tutorial)
- http://www.tug.org/tutorials/tugindia/
  (one of the tutorials)

In addition, we will use preabmle.tex file. So generally, start with:

```
\documentclass[11pt]{article}
\input{preamble.tex}
\begin{document}
```

This will allow you to use the preamble.tex package. To see what preamble allows you to do, look at the

`http://www.cs.ucla.edu/~rafail/TEACHING/WINTER-2010/HowToUsePreamble.pdf`

file, prepared by Robert J. Ragno.
